

Yellowstone Resource Group and Banksia Gardens Maintenance Program

Launched July 2025

By partnering with Banksia Gardens Services, Yellowstone Resource Group has helped create meaningful opportunities for at-risk youth to contribute to local services. Our collaboration with the community house was carefully planned and purposefully executed. Through this partnership, a structured parks and garden maintenance program has been successfully established.

The program not only ensures that maintenance tasks are completed to a high standard, but also provides participants with valuable skills, hands-on experience, and a pathway to employment, empowering them to invest in their future.
